ABOUT ME

Front-End Developer, experienced with: HTML, CSS, JavaScript, ReactJS, NextJS, TypeScript, and a number of frameworks, including Bootstrap, Material UI, Tailwind, and AntD, When I first began, I was working as a bartender. In my spare time, I studied front-end development on a variety of platforms, including "Udemy, Codecademy, and Develhope."

WORK EXPERIENCE

[2019 – 2023]
Front End Developer

Front-End Developer. I utilize the React library, as well as two major frameworks: Tailwind CSS and Material UI. To enhance React, I use a variety of technologies, including "Vite and NextJs." NextJs is my preferred option. It reflects the future and is significantly more dynamic in terms of application development. I use "Git" for version management. I like to stay updated on the technologies I use, and I have a strong drive to learn new methods of working. I prefer working in groups and comparing myself to other devs.

[2019 – 2020]
Front End Developer

Freelance

Worked on projects using ReactJS Library and Bootstrap framework. I have built personal portfolios, dashboards and stores.

[2021 – 2022]
Front End Developer

Freelance

Worked on Web Applications using ReactJS and NextJS , using GIT for version management and two frameworks (Tailwind CSS and MaterialUI). I have built personal portfolios, dashboards and stores
